WHEELS

Get your own graphic in our wheels. Five different shapes available in many sizes. Printable up to 4 colors. Possibility to pack the wheels with your own sticker/label.

LYNX

62 x 46mm Smooth

Ride the city with the Lynx. The perfect wheel for urban pumping and carving. The Lynx are perfect for small cruiser boards.

The wider shape allows comfortable and stable turns. Choose your hardness depending on the grip you are looking for or on the kind of surfaces you want to skate.

Shr 78A

NEBULA

60 x 40mm Sanded

The best wheel to move around. Small, light and fast, the Nebula is available in four duros.

The 78A and 80A duros give you a comfortable ride and more controlled slides at higher speeds. The 82A and 84A duros are perfect to go faster and skate grippier roads.

Shr 80A

CROP 66

66 x 50mm Smooth

The best way to feel the traction, carve and pump harder than ever with the Crop. The 66mm Crop is perfect to feel the grip in the city, a wide wheel, with sharp edges but still fast and reactive. The wheel is perfect to be set up in any kind of board and shape.

Shr 78A

FRACTAL

70 x 47mm Sanded

The ultimate freeride wheel. The special formula of this wheel makes the slides predictable for any kind of rider.

The core shape is specially designed to give you the fastest ride as well as the control needed to slide at high speeds. The 65mm wheel width is thought up for a versatile freeriding and is perfect to set up any kind of board and shape.

Shr 80A

CROP 70

70 x 57mm Smooth

The best way to feel the traction, carve and pump harder than ever with the Crop. The 70mm Crop is perfect for those riders who want to feel the speed. Just choose your favorite hardness and enjoy the smoothness of the Crop.

Shr 78A

TRUCKS

LEAN
TRUCKS

LONGBOARD TRUCKS 150MM & 180MM HANGER

Lean Longboard Trucks come in two different hanger sizes that you can choose from, depending on your board's width and the turn / grip / stability balance you seek.

The bushing seats have been designed to bring you a lineal turn. The hanger's front side has an open bushing seat, allowing a wide lean for close turns and carves. The back side of the hanger has a closed bushing seat though, providing control and stability when most needed.

2MM RAKE AXLE

Both hangers include a 2mm Rake Axle, allowing different set up options. The Rake offers a non-centered axle, so you will feel more or less transmission depending on the way you place the hanger.

2 WHEELBASE POSITIONS

Eight holes for two different wheelbase positions, so you will be able to get even more set up options for your ride.

50° BASEPLATE

The Baseplate of the truck is designed to uses a 50° Kingpin, which brings wide and progressive turns while keeping the stability you need at high speeds.

92A CONE & BARREL BUSHINGS

All the Lean Trucks mount 92A red cone and barrel Bushings, manufactured with our special High Rebound Formula. We use standard barrel and cone bushing sizes, which allows you to use and try different bushing set-ups.

LEAN
TRUCKS

SURFSKATE TRUCK 150MM HANGER

90° BASEPLATE

The Baseplate of the truck is designed to uses a 90° Kingpin, which brings wide and progressive turns while keeping the stability you need at high speeds.

2 WHEELBASE POSITIONS

Eight holes for two different wheelbase positions, so you will be able to get even more set up options for your ride.

92A CONE & BARREL BUSHINGS

All the Lean Trucks mount 92A red cone and barrel bushings, manufactured with our special High Rebound Formula. We use standard barrel and cone bushing sizes, which allows you to use and try different bushing set-ups.

**GENESIS
SURFSKATE TRUCK
160MM HANGER**

This new system was designed using a 160mm hanger and half-moon bushings to keep the weight as low as possible and create the perfect combination of smooth turns and a perfect rebound to gain speed while bombing.

DOUBLE KINGPIN SYSTEM

Our surfskate system provides the turn in two different ways, a front kingpin performing a closest turn and rebound, and a back kingpin providing an extra lean at the end of the turn.

92A CONE & BARREL BUSHINGS

The Hanger is coming with a 92A White Cone and Barrel Bushings, manufactured with our special High Rebound Formula. Both barrel, cone and half-moon bushings are made using a high quality polyurethane.

LIGHT WEIGHT DESIGN

We put riders and designers working together in order to get a new surfskate system achieving three different goals: Functionality, Light Weight and Beauty.

HALF-MOON BUSHINGS

A new in-house development for Lean Trucks, our surfskate system works by compressing two super high rebound bushings made on a half-moon shape.

LASER ENGRAVING

Laser engraving technology to put any image or text on the top of the board.

TOP PRINT

BAR CODE, STICKER & GUARANTEE PLACEMENT

Customize every detail to achieve a unique and exclusive product.

BOTTOM PRINT

COMPLETE

HLC has every part you need to build any complete longboard. Just choose the technical specs you want on your complete or let our staff advise you about the best choice for your needs.
